

## Essay feedback

### Fast fashion/ Problems/ Solutions

#### PROBLEMS

- Use of cheap, toxic fabrics harmful to the environment
- Textile manufacturing requires huge amount of water/also to grow cotton
- Use of oils, synthetic fibres waste more energy than natural fibres
- Microfibres end up in the oceans and rivers polluting them
- Poor quality clothes-do not last for long-buy more-produce more
- Factories and shipping of products cause air and water pollution, affects global warming
- Use of polyester, nylon, acrylic fibres take 100 years to biodegrade

#### SUGGESTIONS

- Buy fewer clothes
- Choose clothes of better quality,
- Check for eco-friendly material and eco-fashion companies on labels
- Recycle our clothes-not to throw them away
- Swap and donate clothes
- Buy from sustainable companies which produce clothes with environmentally-friendly methods, or thrift shops
