

THE IMPACT OF FAST FASHION

Your Weekly Dose of Fashion Inspiration

The production of a simple T-shirt has a big impact on the environment.

Factories use chemicals that pollute water and harm ecosystems.

They also consume a lot of energy, increasing carbon emissions.

In many cases, workers face poor and unsafe conditions.

Δανάη Κωσταίου

Why is it harmful?

- Water pollution
- High energy consumption
- Factory emissions
- Poor working conditions

What can we do?

- Buy less clothes
- Choose sustainable brands
- Recycle and reuse

“Fast fashion costs the Earth.”
